

To order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water, which shall

## Number of Contaminants Required to be Tested

This table displays the number of contaminants that were required to be tested in the last five years. The OCR may contain up

to five years worth of water quality results. If a water system tests annually, or more frequently, the results from the most recent year are shown on the OCR. If testing is done less frequently, the results shown on the OCR are from the past five

Contaminant Group	# of Contaminant
Inorganic Contaminants	16
Disinfection Byproducts	1
Radioactive Contaminants	1
Unregulated Contaminants	4
Microbiological Contaminants	1
Volatile Organic Contaminants	21
Synthetic Organic Contaminants including Pesticides and Herbicides	24

## Inorganic Contaminants
